A) Рубрика

The main entrance to the Kuskovo Palace is made in the form of a high six-column portico with the monogram *PS* incised on the central pediment. Two gently sloping sandstone ramps lead from the entrance and end with sphinx figures on their parapets. The Palace was intended solely for receptions and this accounts for its layout and décor.

B) Рубрика

Legendary soccer team, *FC Barcelona*, pulled off one of the greatest sports comebacks of all-time in a game against rival *Paris St. Germain*. The problem for *Barcelona* was that they lost the first game 4-0. That meant that they'd have to win by 5 goals in the next game ... against a tough team, in a game where final scores are often more like 1-0.

C) Рубрика

You probably haven't given much thought (or even known) about the garbage in space, floating just above Earth. But it's there. And there's a lot more of it than you'd think. Space junk is basically stuff left over from satellites and rocket launches, all man-made things. The problem in addition to there being a lot of it is that each piece travels at about 17,500 miles per hour!

D) Рубрика

Spiders eat mostly insects. They're natural enemies for the most part. Without spiders the insect population would be out of control. And since insects eat plants and trees we have a lot to thank spiders for. "Spiders thus make an essential contribution to maintaining the ecological balance of nature," said Dr. Nyffeler. He's been studying spiders for 40 years!

E) Рубрика

While many people are focusing on Mr. Macron's landslide win and characterizing Ms. Le Pen's defeat as a big one, others are pointing out that Ms. Le Pen's party, *Front National*, did the best it ever has and that there's growing support for her ideas. France has a population of 66 million people and in terms of land is a bit larger than the state of Texas.

FEDOR

FEDOR is a Russian super robot. It can perform many different functions, such as driving a car or physical exercises.

FEDOR can also do household tasks like open doors, insert a key into a lock and lift weights. The robot can work independently, respond to voice, and it can be from different places. Russian scientists and engineers say that soon *FEDOR* will be good at decisions.

FEDOR will also fly into space by 2022. Russian engineers do not say what the robot will do in space. Perhaps, it will work outside the aircraft to take on tasks too for astronauts. Theoretically, robots like *FEDOR* could be used in towns on Mars and other planets. Russian scientists hope that *FEDOR* can be brought into space with a human crew in 2019.
